The Global Energy Parliament is organized by the Isa Viswa Prajnana Trust, a charitable organization which holds Consultative Status to the United Nations ECOSOC. Find us online at: www.ivpt.org

Global Energy Parliament

Empowering 'Humane' Beings

GLOBAL

All human beings belong to one Earth, one Water, one Fire, one Air and one Space. We are all global citizens sharing a common future.

ENERGY

Everything in the universe is vibrating matter (i.e., energy). We are all interconnected, interdependent, and interrelated. Our unique scientific theory provides knowledge that can guide everyone in making better choices.

PARLIAMENT

We are a global parliament of volunteers-- a non-political, international body constituted by scientists, researchers, philosophers, students, specialists from various fields, and dedicated citizens. We search for practicable and innovative solutions for the most formidable challenges facing the world.

Vision

A self-sustaining, peaceful existence for human beings and the Universe.

What We Do

During the parliamentary session, we discuss a problem from all angles within the energy perspective. Our innovative, positive-energy solutions are proposed as Bills, Submissions and Resolutions, which get passed by voting.

- Governments worldwide, as well as the UN and other international organizations, receive our recommendations
- We actively participate in implementing these Resolutions in the form of concrete projects

'One House, One Fruit Tree' Project

A Few Examples...

Total Education

Complete education requires a synthesis between outer knowledge and inner knowledge

"Education for Total Consciousness" (ETC) teaching methodology, developed by His Holiness Jagadguru Swami Isa, trains the learner to see how everything outside is present inside. Students become joyful, responsible, and loving human beings who naturally care for the world as they do themselves.

Training teachers in Education for Total Consciousness; practicing it in the Isa Viswa Vidyalayam Pilot School since 1998.

Sound Energy

Sound is a form of Energy

GEP's Research Centre is developing Renewable Energy devices based on sound. Our vision is to supply green energy to sustain the future generations.

Habitat Harmony

Living in harmony with Nature needs 50% wild land & forest, 30% agriculture, 20% human habitat

Currently, we are creating a Kerala State Master Plan based on sustainable development of infrastructure and use of natural resources. This replicable plan emphasizes a long-term and holistic vision, with particular importance given to spatial planning.
