Welcome to GEP 2023!

Join us for a groundbreaking session of parliament to rediscover the illuminative power of Science and Faith! Rather than supporting the idea that one has exclusive authority over the truth, modern institutions should find a way to integrate both science and faith in helping humankind to answer its most important questions.

We will discuss how we use science and faith in our work and lives, and how they can help human society attain a more sustainable, peaceful and meaningful future.

The 13th session of the Global Energy Parliament is open. Register now to attend as a Member of Parliament!

Theme

Science and Faith

As humanity constantly strives for a better understanding about who we are, what governs the universe, and what truth is, science and faith have always played a role in finding the answers. Scientific knowledge relies on evidence, whereas faith requires none. Originally interdependent aspects of philosophy and thought, they have found hard divisions in the past few hundred years in many parts of the world, and solidified into institutionalization, each with their own set of codes and dogmas.

The false notion of exclusive authority in attaining the most important answers must be removed and once again science and faith should find an integration towards a common goal. In this 13th annual session of the Global Energy Parliament, Members of Parliament will share their views on what role science plays in the problems their branch of knowledge is trying to solve, and what role faith or belief plays. We will elaborate an approach to science and faith that will benefit all branches of knowledge, their outlooks, approaches and ethics.

Join us, if you are interested in the intersections between science and faith and answers to the biggest questions that mankind has!

Venue

The Raj Bhavan of Kolkata

The Global Energy Parliament is honoured to be hosting its 13th annual session at the Raj Bhavan of Kolkata.

Raj Bhavan is the official residence of the Governor of West Bengal (presently Dr. C.V. Ananda Bose), located in Kolkata, the capital of West Bengal. Built in 1803, it was known as Government House before Indian independence.

The total area occupied by the Raj Bhavan is 27 acres. The most illustrious son of the Curzon family, George Nathaniel Curzon came to occupy the Raj Bhavan as the Viceroy of India 100 years after it was built. Lord Curzon described the Government House as “without doubt the finest Government House occupied by the representative of any Sovereign or Government in the world.”

Programme

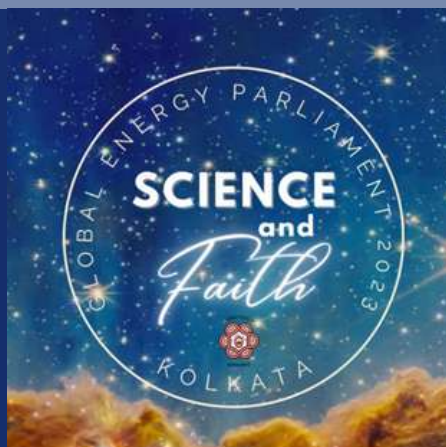

November 29, 2023

Inauguration by Hon. Governor of West Bengal
Founder's Address: Introduction and Vision for the session
Introduction to the unifying I-Theory
Question Hour: Questions to Ministers on the theme
Lunch
Call-Attention Motion
Submissions by Members with responses by Ministers
Committee Breakout Meetings

November 30, 2023

Keynote Address
Moving the Bill on Science and Faith
Submissions by Members with responses by Ministers
Lunch
Committee Breakout Meetings
Final Conclusions
Valedictory Session
Cultural Programme

**Programme is subject to change.*

Our Aim

We believe that any solution must be scientifically grounded in the principles of energy balance, taught by the I-Theory, to be truly realistic and sustainable.

The Global Energy Parliament is the first and only global parliament, designed for all human beings who feel a responsibility to maintain and improve the condition of the world and those who inhabit it.

Using the science of energy, Members of Parliament discuss the best ideas to overcome the most formidable challenges facing life on Earth. In Parliament, they pass Bills and Resolutions in a spirit of harmony, peace and unity.

Our Secretariat and Ministers communicate these resolutions to the world's governments and international agencies.

Committees are constituted by Members who take the Parliament's suggestions to successful implementation.

Ministries & Committees

Our Ministries:

Agriculture
Culture
Education
Environment
Finance
Forests
Health
Housing and Planning
Human Resources
Law & Justice
Parliamentary Affairs
Peace and Global Affairs
Power
Science and Technology
Social Welfare
Water and Natural Resources

New Committees for 2023:

Education
Global Science Ethics
Sustainable Economy
Integrated Healthcare

Make a Submission

All Members of Parliament have the opportunity to contribute their ideas to the parliament. One important way this happens is through Written and Oral Submissions.

Written Submissions

Written Submissions are given in advance. These outline the Member of Parliament's research on the topic and their recommendations for what the Parliament ought to adopt in terms of a resolution, recommendation or policy suggestion to governments.

Oral Submissions

Some Written Submissions will be selected for presenting in the parliament as an Oral Submission. An Oral Submission is a summary of the Member's main ideas given as an oral argument in a persuasive speech to the Parliament.

Who We Are

The Global Energy Parliament (GEP) is an international body working for science, sustainability, and peace, founded by His Holiness Jagadguru Swami Isa. GEP is organized by the Isa Viswa Prajnana Trust, a registered charitable organization holding Consultative Status to the United Nations' Economic and Social Council.

Since 2010 GEP has organized annual international sessions of parliament to collaborate on innovative solutions to the most pressing issues facing the world. The Acts and Resolutions of the Parliament are conveyed to the world's governments annually.

Mission

- To provide recommendations and strategies, backed by scientific research, with the objective of ensuring a self-sustaining, peaceful existence for human beings and the universe.

Vision

- To develop human thought about the relationship between internal and external energy
- To promote and develop scientific research on energy
- To design policies based on the science of energy
- To create public awareness about energy balance, and programs to allow individuals to realize its benefits.
